

University of Colombo, Sri Lanka

DEGREE OF BACHELOR OF INFORMATION TECHNOLOGY (EXTERNAL)

Academic Year 2022 — 1st Year Examination — Semester 1

IT1106 — Information Systems

Multiple Choice Question Paper (Two hours)

Important Instructions

- The duration of the paper is Two (2) hours.
- The medium of instructions and questions is English.
- This paper has 40 questions on 10 pages. Answer all questions.
- All questions are of the MCQ (Multiple Choice Questions) type.
- Each question will have 5 (five) choices with one or more correct answers.
- All the questions will carry equal marks.
- There will be a penalty for incorrect responses to discourage guessing.
- The mark given for a question will vary from -1 (All the incorrect choices are marked & no correct choices are marked) to +1 (All the correct choices are marked & no incorrect choices are marked). However, the minimum mark per question would be zero.
- Answers should be marked on the **special answer sheet** provided.
- Note that questions appear on both sides of the paper. If a page is not printed, please inform the supervisor/invigilator immediately.
- Mark the correct choices on the question paper first and then transfer them to the given answer sheet which will be machine marked. Please completely read and follow the instructions given on the other side of the answer sheet before you shade your correct choices.
- Calculators are not allowed.
- All Rights Reserved. This question paper can NOT be used without proper permission from the University of Colombo School of Computing.

- (A.) Start-up the computer
 (B.) Browse the internet and search for graphics
 - (C.) Edit graphics
 - (D.) Prepare a report
 - (E.) Manages computer memory and files
 - (F.) Controls access to printers connected to the network

Which of the above activities can be accomplished using computer application software?

- (a) Only A, B and C
- (b) Only B, C and D
- (c) Only C, D and E

- (d) Only D, E and F
- (e) All the activities
- 7) The control or suppression of publishing or accessing of information on the internet is termed as,
 - (a) Information Security
- (b) Digital Divide
- (c) Net Neutrality

(d) Ethics

- (e) Internet Censorship
- 8) Consider the following information system acquisition methods and their descriptions listed under columns A and B, respectively.

A

- I. Buy off-the-shelf software
- II. Build a custom application
- III. Choose a software service provider

B

- I. Though it takes time, it can match an organisation's needs well.
- II. The organisation can use the required software and pay on a subscription model.
- III. It is the fastest method to acquire and deploy a software solution.

Which of the following correctly matches the information system acquisition methods given in column A with their descriptions in column B?

- (a) A(I)-B(I), A(II)-B(II), A(III)-B(III)
- (b) A(I)-B(II), A(II)-B(III), A(III)-B(I)
- (c) A(I)-B(III), A(II)-B(II), A(III)-B(I)
- (d) A(I)-B(I), A(II)-B(III), A(III)-B(II)
- (e) A(I)-B(III), A(II)-B(I), A(III)-B(II)
- 9) To be a Chief Information Officer (CIO) of an organisation, one should be able to,
 - (a) develop and deliver training on proper security measures.
 - (b) use financial and accounting information systems efficiently.
 - (c) develop information systems to meet the organisational requirements.
 - (d) assess the needs of the information technology workforce and make strategies to achieve those needs.
 - (e) provide leadership and direction to the information systems department to help the organisation achieve its goals.

- 10) The role of a System Analyst includes,
 - (a) Testing and debugging the software.
 - (b) Assisting in matching technology to users' needs.
 - (c) Authoring the software that customers and employees use.
 - (d) Converting a program design into one of many computer languages.
 - (e) Conveying system requirements to software developers and network architects.
- Which of the following statements is/are CORRECT regarding Business Process Reengineering?
 - (a) It is an incremental approach to change the existing business process.
 - (b) It introduces minor changes to the existing business processes.
 - (c) It aims to improve the business process within a very short time.
 - (d) It can bring broad and cross-functional improvements to the information system.
 - (e) It results in a radical redesign of the business process.
- Many organisations having e-commerce platforms use both buy-side e-commerce and sell-side e-commerce to support the organisation's value chain. The buy-side e-commerce activities include,
 - (a) negotiating and establishing prices and terms.
 - (b) providing a portal of information of interest to the customer.
 - (c) identifying and comparing competitive suppliers and products.
 - (d) encouraging sales and generating leads from potential customers.
 - (e) providing information for customers to evaluate the organisation's goods and services.
- Which of the following form of e-commerce allows its customers to deal directly with an organisation and avoid intermediaries?
 - (a) Business-to-Business

(b) Consumer-to-Consumer

(c) Business-to-Consumer

(d) Public-to-Business

- (e) Consumer-to-Public
- 14) e-Government should be the application of Information and Communication Technologies (ICTs) to,
 - (a) persuade citizens and governments around the world to support the government through donations.
 - (b) share government information among the citizens and make them believe and trust the government.
 - (c) government functions and procedures with the purpose of increasing efficiency, transparency and citizen participation.
 - (d) win elections by positively influencing the citizens' attitudes about political issues, leaders, government institutions and events.
 - (e) simplify the sharing of information, speed up business processes, and improve the relationship between citizens and government.

(b) A, D, B, C

(c) B, C, A, D

(d) C, D, A, B

- (e) D, C, B, A
- 36) To avoid computer-related waste and mistakes, organisations can,
 - (a) Conduct training programmes for employees on how to use computer resources.
 - (b) Prepare and disseminate manuals and instruction sheets on how to use the computer resources.
 - (c) Implement policies and procedures to acquire, use and dispose of computing devices and services.
 - (d) Expel the employees who are found guilty of misusing or making mistakes in using the computers.
 - (e) Provide access to computer resources only to the employees who have obtained certificates on how to use them.
- 37) Consider the following terms listed under column A and the definitions under column B.

A

- I. Cyber-libel
- II. Cyberbullying
- III. Cyberloafing

В

- I. The action of the employees who use computer resources for personal use while pretending to be doing office work
- II. The act or crime of making false statements to harm an individual's or a business organisation's reputation
- III. The act of harassing individuals using information technology mainly via social platforms

Which of the following correctly matches the terms given in column A with the definitions in column B?

- (a) A(I)-B(I), A(II)-B(II), A(III)-B(III)
- (b) A(I)-B(II), A(II)-B(III), A(III)-B(I)
- (c) A(I)-B(III), A(II)-B(II), A(III)-B(I)
- (d) A(I)-B(I), A(II)-B(III), A(III)-B(II)
- (e) A(I)-B(III), A(II)-B(I), A(III)-B(II)

- To overcome the privacy issues associated with *apps* for instant messages, texting and emails, people should,
 - (a) not open files or click links in messages from people you do not know.
 - (b) stop using emails and apps such as WhatsApp and Instagram for instant messaging and texting.
 - (c) never send sensitive personal data such as credit card numbers, and passwords via text or instant messages.
 - (d) never send messages and photos you would be embarrassed to have your family members, colleagues, or friends read.
 - (e) select a texting or instant messaging *app* that receives high security ratings, and consider using a service that encrypts texts.
- 39) Which of the following statements is/are CORRECT regarding ergonomics?
 - (a) It is the science that studies human behaviour as a relationship between ends and scarce means which have alternative uses.
 - (b) It helps to reduce job related injuries, illnesses, and stresses, and to increase job satisfaction, which leads to improve productivity.
 - (c) It is the science of designing information system infrastructure to maximise the safety, comfort, and efficiency of their users.
 - (d) It is the study of how people allocate scarce resources for production, distribution, and consumption, both individually and collectively.
 - (e) It considers factors such as slope of the keyboard, position and design of display screens, and placement and design of computer tables and chairs.
- 40) Which of the following CANNOT help to protect computers and/or data in computers?
 - (a) Antivirus Software
 - (b) Distributed Denial of Service
 - (c) Encryption
 - (d) Flaming
 - (e) Firewall
